Prepositions.vs.Adverbs.2.PHWritingGrammar.TE.ex.12.page.369

**Black holes are created from
giant exploding stars.**

The matter inside the core is
so heavy that it collapses in
on itself.

**Matter that comes close to
the hole gets swallowed up.**

**Once it is sucked in, it cannot
leave.**

**The black hole closest to us is
more than 4,800 light years
beyond Earth.**
